

MOHAMAD FIKIH AMAR DANI

WEB DEVELOPER

ABOUT

I'm a web developer who are expertise in programming especially in web development. I have experienced for more than two years on web development since I was in vocational highschool. Currently focused on web development including front and back end, version management with git. I always keen to learn deep into the fundamentals of the languages and moving forward into web development with the latest technologies required to work with it.
